## DETAILED ACTION

### ***Election/Restrictions - Restriction Requirement***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 64-74, drawn to a method of producing a multilayer bellows seal.

Group II, claims 75-89, drawn to a multilayer bellows seal.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I (i.e., claims 64-74, drawn to a method of producing a multilayer bellows seal) have the special technical feature of the steps of submitting said sheets to a shaping step to obtain corresponding hollow cylindrical bodies and placing the obtained hollow cylindrical bodies inside one another.

Group II (i.e., claims 75-89, drawn to a multilayer bellows seal) have the special technical feature of at least first and second superimposed layers, in close mutual contact, wherein at least one face of said first layer facing said second layer has at least one channel.

A telephone call to Applicants to request an oral election to the above restriction requirement was not made due to the complexity of the election.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gay Ann Spahn whose telephone number is (571)-272-7731. The examiner can normally be reached on Monday through Friday, 10:30 am to 7:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl D. Friedman can be reached on (571)-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
